Water Transfer Pumps

Water Master water transfer pumps are renowned for their quality and reliability. These pumps are powerful, efficient, light-weight and portable. They are suitable for transferring high volumes of water at relatively low pressures and can be used for flood irrigation, construction site dewatering and fast fill tanker applications. Available in 1", 2", 3", 4" and 6" with heads up to 34m and flows up to 2750 L/min.

Powered by a genuine Honda or Yamaha engine these units won't let you down. Roll Over Frame is provided as a standard for extra protection and easier transportation for when you need to move water quickly and safely.
